## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-5, drawn to a suture stay removably mounted to a retractor frame with blades mounted thereon, classified in class 600, subclass 231.
- II. Claim 6, drawn to a retractor frame/blade system with stabilizer adapted to be coupled to rails on the frame, classified in class 600, subclass 231
- III. Claims 7-9, drawn to a stabilizer mounted to an articulated arm, classified in class 600, subclass 229.
- IV. Claim 10, drawn to a suture stay, classified in class 606, subclass 233.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the invention as grouped has separate utility such as with other retractor frame structural designs other than that recited by each of the remaining Groups. For example each of Groups I, III and IV may be mounted on any table structure or frame. Furthermore, Group II is drawn to an independent structural design of a retractor system. See MPEP § 806.05(d).

Art Unit: 3732

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for the Groups taken separately is not required for the remaining Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
